# THERMAL CONTROL SOLUTIONS FOR RELIABLE LOGISTICS

## INSULATED BAGS

---

- Insulated bags provide compact, flexible thermal protection for smaller deliveries or internal movements.
- Manufactured from waterproof and easy to clean fabrics in a variety of options for food and pharma applications.
- Fabric colours can be matched to your brand colours and your brand logo can be included to enhance security and brand awareness.
- Strong straps, handles, document wallets and pouches can all be included in your design.
- Closure options include top quality Velcro and zips which means these bags can be used 100's of times.
- Numerous insulation options are available ranging from recycled PE through to high performance polyester to meet a variety of thermal values

## COLD PACKS AND TEMPERATURE LOGGERS

---

- Designed to enhance the thermal consistency and stability of our covers and bags.
- Available as freezer packs, ice packs or gel packs to suit each individual application.
- Our temperature loggers are engineered to provide accurate and reliable temperature data for a wide range of applications

## THERMAL FOIL LINERS FOR CONTAINERS

---

- Our thermal foil liners protect cargo from irreversible damage caused by extreme temperature and moisture fluctuations
- We offer three options of attachment depending on whether you require high speed fitting times or a low cost budget system

At Palband, we're constantly building on our success within the logistics and distribution market with reusable and recyclable products, and with the ever increasing need for better protection for perishable items, we're continually enhancing our cold chain product offering with new innovations.

We stand out as having the unique ability to create bespoke and customised thermally insulated products that suit any application within the cold chain distribution and logistics environment.
